SPORTFISHER SPINNING LINE CAPACITIES

MODEL	GEAR RATIO	MONO CAPACITY	BRAID CAPACITY
FS50	4.9:1	225 yds. / 12 lb.	200 yds. / 50 lb.
FS60	4.9:1	240 yds. / 14 lb.	240 yds. / 50 lb.
FS70	4.9:1	310 yds. / 17 lb.	220 yds. / 65 lb.
FS80	4.9:1	330 yds. / 20 lb.	278 yds. / 65 lb.

DOUBLE-SUPPORTED PINION GEAR
Sportfisher's large brass pinion gear is double-supported by strong bearings to offer perfect alignment even under heavy fishing loads.

NEW FOR 2010

Sportfisher™

by FIN-NOR

Sportfisher is ready whenever you are.

Anglers who may have never experienced Fin-Nor's legendary quality now have an entry-level price spin series, built for the value-minded angler who still demands the durability and excellence that makes Fin-Nor stand out from all other brands.

Introducing Sportfisher™.

These stylish new spinning reels feature strong aluminum bodies, computer-balanced rotors and spools, and are available in four specific sizes. Plus, each Sportfisher spinning reel is also available as a perfectly matched combo.

The Sportfisher series is a perfect beach house commodity during the summer, and are always ready for quick pick-up the moment the fish are running. Fin-Nor quality workmanship makes Sportfisher great tackle, and a great value.

Titanium-Nitride Coated Line Roller

This hard coating is perfect for both monofilament or braided lines and is supported by, and smoothly turns, on a ball bearing roller.

Oversized Multi-Stack Drag With Carbon Fiber Washers

Oversized multi-stack drag washers allow Sportfisher tremendous drag range. This sealed drag has carbon fiber washers that make it smooth-running and able to handle heavy drag loads. This is a reel ready for big fish.

Aluminum Body, Side Plate And Rotor

Strong aluminum body and rotor keep the reel from twisting or flexing even under heavy loads. Patented computer rotor design creates perfect balance. Special anti-corrosion protection has been added to the outside – and inside – of the reel to help protect it from the damage that can occur in a harsh saltwater environment.

Forged, Machined Aluminum Spool and Sealed Drag

A strong spool like this can handle heavy loads, and it also has a patented asymmetric level-wind for perfect line lay.

Ergonomic Handle Knob

This handle is more than enough to hold on to during a long fish fight, and comfortable enough to use all day. Sportfisher is a reel easy to pick-up, and easier to use.

Strong Brass Pinion Gear

Durable brass pinion gear and oversized drive gear are supported on both sides with oversized bearings to keep perfect alignment – even under heavy loads. This means you can put tension on your drag and not worry about gear flex or slippage.

Anti-Reverse Clutch Support

Sportfisher's strong anti-reverse clutch offers you solid hooksets and is supported with an equally strong aluminum clutch housing that makes this reel durable, long-lasting and able to tackle big fish.

Sportfisher Spinning Combos

All Sportfisher spinning models are also available as a pre-mounted combo. Each is perfectly matched with a heavy-duty E-glass rod that features aluminum-oxide guides, comfortable EVA grips, and a rubber gimble for comfortable, all-day use.
