

VAN STAAL®

NO LIMITATIONS

When Van Staal adopted the tag line “NO LIMITATIONS,” we understood there were anglers who don’t want to be held back - those who never want to be limited in their fishing or with their tackle. Van Staal was created to fill this need – tackle designed to be used in the toughest of elements, for the biggest of fish, and never fail.

Van Staal was created to take into the surf, sand and salt, for those wanting to wrestle monster striped bass. These fishermen go out into the waves, searching for the furthest rock they can wade or swim to and cast out next to the schools of cruising baitfish to reach bigger, stronger fish than they could hook closer to shore. These are the fishermen who put more into fishing, and demand more from their tackle. They have no limitations and expect that their tackle will perform the same way. Van Staal does.

Only Van Staal offers a complete line of machined spinning reels and machined fly reels. Our spinning reels are cut from the finest aircraft grade 6061-T6511 aluminum, hardened stainless steel, brass and titanium to create the reel bodies, spools, handles, gears and center shafts, and sealed-up water-tight so that it can be used both in, and under, saltwater. Van Staal reels hold massive line capacities and will not twist or flex even under the heaviest strain. Go ahead and use heavier braided lines to pursue tuna, marlin, tarpon and shark.

Available in sizes that can handle 6# monofilament up to 100# braided line, all Van Staal spinning reels offer you the line capacity and drag lock-down you need to hold the biggest fish you've ever encountered.

Van Staal reels have the largest gears in the industry - in any type of reel! Individually cut out of hardened stainless steel, their design creates greater tooth surface contact between the main gear and the pinion. No gears work better under extreme load. Many reels feel good out of the box at the store, but are weak and rough later on. Van Staal reels are designed to work smoother and better under load – and last forever.

Van Staal surf reels offer titanium line rollers specially hardened to be used with either monofilament or braided lines for however and wherever you fish so you don't have to worry about the performance of your Van Staal reel.

Van Staal does more for you when it really counts. For the past fifteen years, we've built every product to do just that. Machined spinning and fly reels, solid titanium pliers and sturdy wear-resistant surf bags. Every effort has been put into creating the highest quality and strength possible. We know you want that - and we hope you need it. We're counting on you making a fishing trip to a remote location and finally hooking the fish of your lifetime. We want to be there with you - with tackle that doesn't hold you back. When fishing has no limits - we offer you the tackle that can handle it. At Van Staal we believe that the tackle you selected should never limit you.

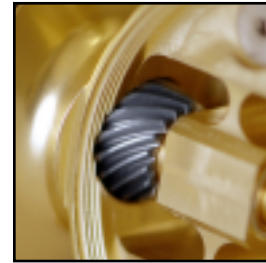

We believe there are NO LIMITATIONS.

VAN STAAL®

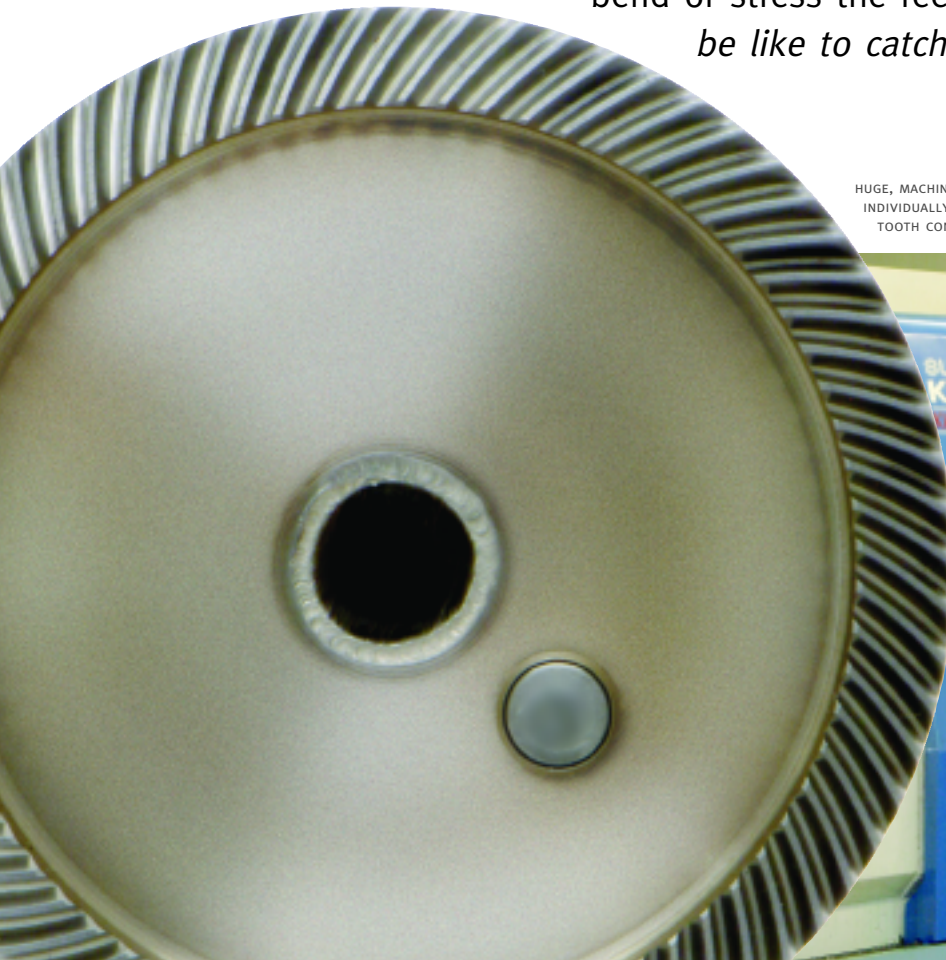

Van Staal not only does what is asked, it exceeds your expectations. No other brand reaches as far for you as Van Staal. Expertly machined out of aircraft grade aluminum, stainless steel and titanium, Van Staal uses the best materials to build the strongest reels

STRONG 416 HT STAINLESS STEEL PINION GEARS ARE USED IN ALL VAN STAAL SPIN REELS

possible. With reel bodies, handles and spools machined out of aircraft grade aluminum, they never flex or twist even under heavy load. The center shaft is machined from solid titanium and finished with titanium nitride, so you can put the heaviest braided line on a Van Staal spin reel, lock down the drag to over thirty pounds of pressure and still know that you will never bend or stress the reel. *Ever wondered what it would be like to catch a marlin on a spinning reel?*

HUGE, MACHINED STAINLESS STEEL SPIRAL BEVEL GEARS ARE USED IN ALL VAN STAAL SPIN REELS. INDIVIDUALLY CUT OUT OF HARDENED STAINLESS STEEL, THEIR DESIGN CREATES TREMENDOUS GEAR TOOTH CONTACT BETWEEN THE MAIN GEAR AND THE PINION. NO GEARS WORK BETTER UNDER LOAD.

You also have your choice of hard anodized finish color – gold, black or silver. The anodization process creates a protective barrier strong enough to fight the effects of a harsh saltwater environment even after years of heavy abuse.

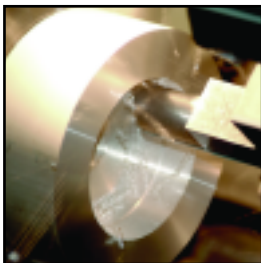

VAN STAAL'S C-VEX FLY REELS FEATURE A SEALED DRAG IN THE SPOOL AXEL TO KEEP OUT SAND AND SURF.

Another exclusive feature of Van Staal reels is the famous sealed drag system. We recognize the importance of a strong, reliable drag system, and we've designed the Van Staal drag to be completely sealed to keep out the sand and salt, and **even let you submerge your reel** without worrying whether or not the components are still able to function properly.

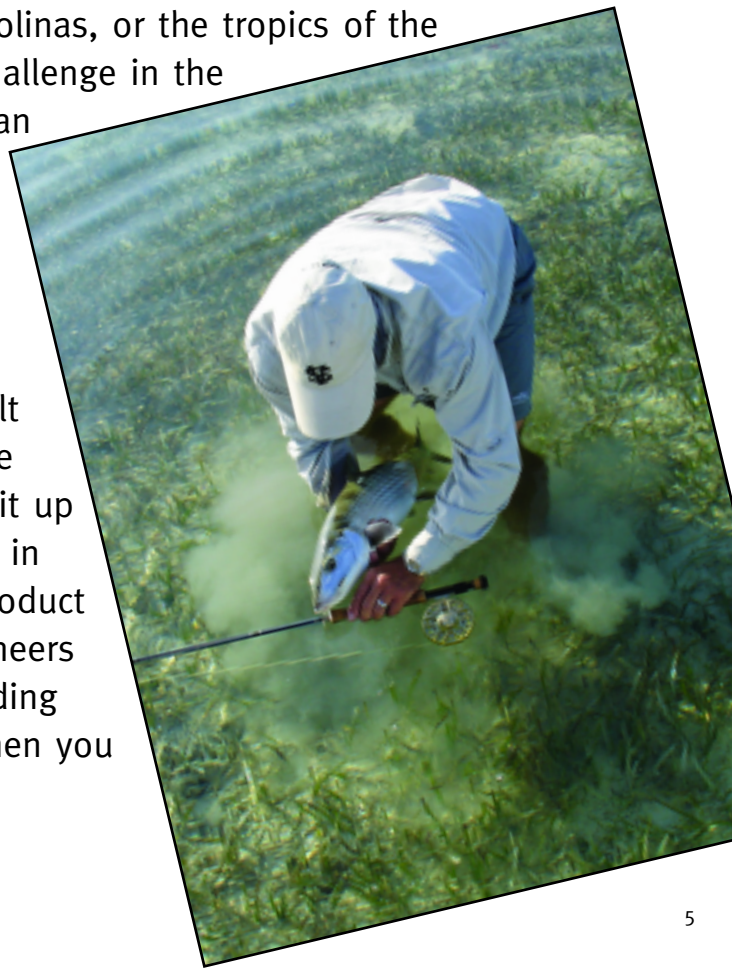

VAN STAAL'S MAINTENANCE-FREE DRAG SYSTEM IS SMOOTH AND WATERPROOF, AND OFFERS UP TO 30 POUNDS OF LOCK-DOWN PRESSURE.

Van Staal spin reels and C-VEX fly reels represents the finest saltwater tackle found anywhere. It doesn't matter if your fishing the surf of Montauk point, the breezy beaches of the Carolinas, or the tropics of the Keys. It doesn't matter if you've found your challenge in the big blue waters of the Pacific, because your Van Staal reel is the only gear you'll need, wherever your next big challenge is.

PRECISION MACHINING IS THE HALLMARK OF A VAN STAAL REEL. THIS EXACTING PROCESS ALLOWS US TO BUILD A PRODUCT TO EXTREME TOLERANCES, ENSURING THAT YOUR VAN STAAL REEL WILL LAST.

Our commitment to you is providing a product that is built with the finest materials, to the finest tolerances, and backing it up with the best customer service in the industry. Each Van Staal product has a committed team of engineers and service professionals standing with you, and just like our reels, are ready when you need us.

VS Surf Spin

Proven for the surf, these no-nonsense reels aren't afraid of any situation - they can do it all. Available in a range of sizes from the light-action VS100, all the way to the heavy-weight VS300 that holds a massive 675 yards of 80 pound braid. These reels feature 30 pounds of lock-down drag for the confidence you need when battling the biggest cobia or striper, or wearing down a hard-fighting tuna or marlin.

VSB Titanium Bail Spin

Now you can fish a titanium-bail reel, in the surf or from a boat, with the same solid feel and performance of our standard spin reels. Skirted spools and a new oversized anti-reverse clutch guarantee rock-solid hook-sets while an extended handle and larger knob provide more cranking power.

Like all Van Staal reels, they're sealed water-tight so you can fish them anywhere.

C-VEX Fly

Named for their unique convex shape (to add strength while reducing weight) all C-Vex reels are machined from aircraft-grade aluminum, anodized for saltwater protection, and feature a completely sealed, waterproof drag system that easily tames the elements...and big fish.

The C-Vex drag is the most innovative drag ever created. The modular design needs zero start-up inertia and can be tightened down to big-game strength for smooth-running drag pressure.

ONE REVOLUTIONARY DRAG. TWO INTERCHANGEABLE SPOOLS. INFINITE PERFORMANCE. GIVING YOU INNOVATION, VERSATILITY AND VALUE.

Van Staal Rods

With a multi-layer construction process, Van Staal rods offer parabolic strength and lifting power that perfectly compliment our reels. They are specifically designed for saltwater jigging, the hottest trend in fishing. Van Staal rods are built with the highest quality Fuji components, including Alconite and Silicon Nitride II guides for braided lines.

They also feature a split-grip EVA handle for balance and lightweight, as well as capped anodized aluminum butts for fishing comfort and secure lock.

A SPECIAL MACHINED ALUMINUM GIMBLE BUTT PROVIDES A STURDY, YET COMFORTABLE AND SECURE LOCK-DOWN DURING THE BATTLE.

FUJI SILICON NITRIDE II (SIN) HAVE THE STRENGTH TO STAND UP TO HEAVY BRAIDED LINE AND ARE 30% LIGHTER THAN STANDARD HEAVY-DUTY GUIDES.

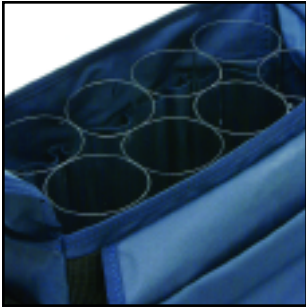

DOUBLE-ROW TACKLE BAG

AVAILABLE IN DOUBLE ROW, SINGLE ROW AND FANNY PACK, ALL VAN STAAL BAGS ARE DESIGNED WITH SERIOUS SURF FISHERMEN IN MIND. JUST LIKE VAN STAAL REELS, RODS AND PLIERS, THESE BAGS WILL PROVIDE A LIFETIME OF LIMITLESS USE.

SINGLE-ROW TACKLE BAG

LARGE THERMOPLASTIC TUBES LET YOU EASILY ORGANIZE YOUR FAVORITE SURF PLUGS. EACH TUBE MEASURES 2.5" IN DIAMETER AND IS 7" TALL.

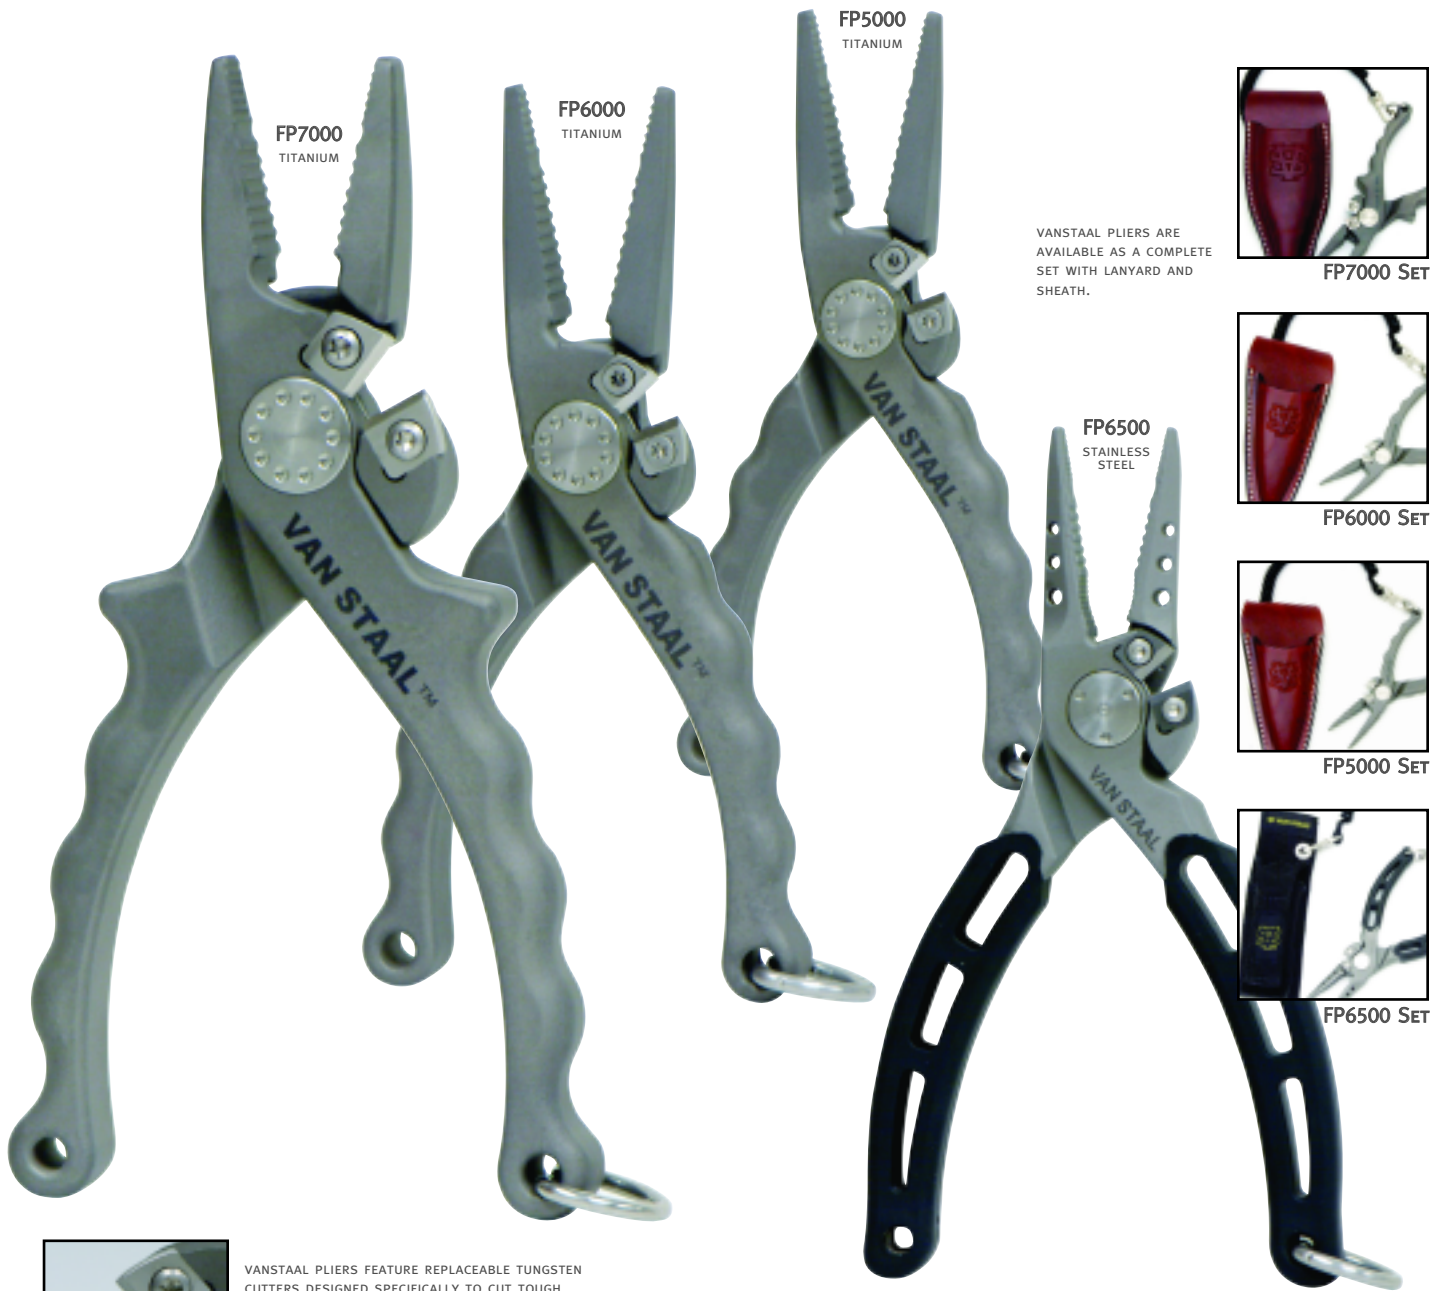

Van Staal bags allow you to go into the surf, where you want to go, with what you want to take along. Heavy multi-layer nylon construction is rugged enough to withstand the rocks, sand and waves. Each bag offers sewn pocket slips and grommet water holes to allow for quick drainage. Over-sized vertical thermoplastic tubes are designed for the biggest surf plugs and lures. Tough velcro keeps the flaps secure, while lanyard rings keep your tools quick at hand.

MODEL	TYPE	INSERTS	DIMENSIONS
